

LOUNGE | SIMPLICITY AND MODULARITY

LOUNGE offers plenty of room for good friends and memorable conversations. Clean lines accent this basic modular concept allowing individual units to be configured to form unlimited shapes and variations.

Unique brackets may be mounted to the bottom of the modules for quick and solid connections. Combining or separating units creates endless seating areas cleverly emerging as generous islands, niches and corner sections.

In addition to the rich, brown color of java, the collection remains available in bleach, a color way exclusively developed for LOUNGE with a softly distressed hand and patina reminiscent of charming, sun-weathered California beach houses.

This season, the LOUNGE collection becomes complete with the addition of a new sun lounge expanding the application of the ultra comfortable chaise to the home, hotel or beachside.
